

Principles of Economics (Economics 101)

Patrick Conway
300-F Gardner Hall
Phone: 966-5376
E-mail: patrick_conway@unc.edu
Office Hours: 2 - 3 pm, Monday through Thursday

Summary:

Principles of Economics (Economics 101) is the introductory course in Economics for undergraduates. It is a one-semester course that addresses the important issues of the 21st Century from an economic point of view. This course is the gateway course for the major of Economics; if you wish to major in Economics you must have at least a C in this course. It also meets the General Education requirement for an "Approaches" course in social and behavioral sciences.

Organization:

We will meet two times a week, on Tuesday and Thursday at 11 am in Carroll 111. Attendance will be taken, and excessive absences will result in a reduction in your final grade.

Grading:

You will be responsible for two midterm exams and one final exam; the schedule for these examinations will be provided on the "Calendar" page of the web site for this course. There will be no make-up examinations given; if you are unable to attend the midterm examinations, the weight of that exam in your final grade will be transferred to your performance on the comprehensive final exam. Each midterm exam will be worth 25 percent of your grade, and the final will be worth 35 percent.

You will also be responsible for weekly online assignments using the Aplia software bundled with the text. Your grades on those assignments will be averaged into an assignment grade that will represent 10 percent of your grade.

The final 5 percent of your grade will be awarded for two written policy memos that you will prepare during the semester.

Resources:

Web site: Our web site within Sakai provides you a structure and outline for your weekly activities in this course. I will also use that web site to communicate with you. When you are registered for the course, this web site should appear automatically once you log into Sakai. If it does not, please contact the ITS Help Desk by phone or in the basement of the Undergraduate Library.

Text: We will be using a Cengage custom text entitled "Economics: Principles and Policy, Fall 2012". It is made up of a selection of chapters from the hardcover text "Economics: Principles and Policy (12th edition)" by William Baumol and Alan Blinder. I've chosen this route to save you some money, but you're welcome to purchase the hard cover text. (Be sure that you get the 12th edition.)

The readings for each class are enumerated on the class schedule on the web site. It is in your interest to complete the readings prior to the class indicated on the schedule.

Aplia: When you purchase your softcover text, you will receive electronic access to Aplia. There you'll find electronic version of the complete Baumol/Blinder text. You'll also find weekly problem sets to work to check your understanding of what we discuss in class. You will need access to this Web-based resource, since these problem sets will be graded.

Newspapers and journals: One of your graded responsibilities in this course will be to write policy memos based upon newspaper and magazine articles on economics topics. The articles will be chosen from economics-themed articles in the New York Times, the Wall Street Journal, the Economist magazine or the News and Observer. I will give you the opportunity to purchase a low-cost subscription to either the New York Times or the Wall Street Journal. This is not required, but is certainly convenient. You can also find current issues of these publications in the UNC Library each day.

The UNC Honor Code:

Our behavior (yours, the TAs, and mine) in this class is governed by the UNC Honor Code. If you do not yet understand your responsibilities under this code, I urge you to go to <http://honor.unc.edu> to learn more. I take the Honor Code very seriously.

Economics 101 : **Principles of Economics**

Fall 2012

Professor Patrick Conway

Class	Date	Topic	Reading from Baumol/Blinder
1	Aug 21	Course Introduction	Chapters 1&2
2	Aug 23	Scarcity, opportunity cost, marginal analysis	Chapter 3
3	Aug 28	Comparative Advantage and PPF	
4	Aug 30	Introduction to Demand and Supply analysis	Chapter 4
5	Sept 4	Market Equilibrium	
6	Sept 6	Rational expenditure rules; opportunity cost	Chapter 5
7	Sept 11	Production, input and cost	Chapter 7
8	Sept 13	Efficiency and marginal-cost pricing	Chapter 8
9	Sept 18	Comparative advantage and international trade	Chapter 35
10	Sept 20	The stock market and business finance	Chapter 9
