

Economic 468
Socialism, Planning and Russian Economy
TTH 8AM – 9:15PM

Rosefielde
Fall 2022

Instructor: Professor Steven Rosefielde
Office: 300D Gardner Hall

Prerequisites: Econ 310, C or better in Econ 400 and 410
Website: <http://sakai.unc.edu>
Credit Hours: 3 credits

Syllabus and Requirements

Course Description

Russian economy elaborates Vladimir Putin's managed market system in post-Soviet socialist perspective. The course introduces students to the concepts of socialism and planning. It outlines the fundamentals of Soviet command socialism, investigates its weaknesses, and explains why the USSR's economy imploded. It describes Putin's transition strategy, highlights its characteristics, including its residual socialist features, investigates the new system's economic potential and assesses its merit using the competitive consumer sovereignty standard. These insights illuminate the economic factors that facilitated Russia's invasion of Ukraine February 24, 2022 and the Kremlin's ability to weather the West's punitive economic sanctions.

At the end of the course, students will be able to understand the costs and benefits of Soviet socialism, and socialist economy more broadly, as well as Russia's ability to engage in a new Cold War with the West.

IDEA Course:

Russian Economy is a FOCUS CAPACITY course that enables students to encounter key capacities (Identify, Discover, Evaluate, Act) under the category of **Global Understanding and Engagement**.

Students will study and engage with global processes shaping the world and its peoples, including those beyond the North Atlantic region (United States, Canada, and Western Europe). Topics include globalization and anti-globalization movements, resurgent socialist idealism, transnationalism, and authoritarianism.

Students will develop deep knowledge of historic or contemporary roles and differential effects of human organizations and actions on global systems.

Topics covered in this course will help students answer important questions.

Questions for Students:

What forces connect and distinguish the experiences of socialist and Russian societies with other societies, and human organizations around the world? How can I understand and compare socialist and Russian worldviews from other outlooks? What connections and differences exist between Western, socialist and Russian worldviews, experiences, societies, or power structures? What ideas, approaches, and international sources allow scholars to compare Western with socialist and Russian societies? Why did Russia invade Ukraine?

Francisco de Goya
Que viene el coco (**Here Comes the Bogey-Man**) 1799

How does this course satisfy the Ways of Knowing focus capacity Learning Outcomes?

Students will be taught the socialist theories and planning concepts that shaped Soviet civilization and will be shown how to evaluate these constructs with neoclassical economic welfare theory. This will allow them to grasp Soviet performance from the consumer utility and social wellbeing standpoints. Students will be taught how to perform the same analysis for Putin's managed market economy. Students will be taught how to apply neoclassical economic hypothesis testing to objectively assess the comparative merit of Soviet socialist and Russia's system. Students will be taught how to evaluate economic science-related claims and information from popular and/or peer-reviewed sources by examining the relationship between the evidence, arguments, and conclusions presented and by assessing consistency with existing knowledge from valid and reliable scientific sources. Students will be taught how to identify, assess, and make informed decisions about ethical issues connected with the Soviet and Russian systems.

The recurring capacities will be met through the following activities:

Students will be given writing assignments or class work, or term paper or something else totaling at least 10 pages in length, or the intellectual equivalent. (Optional thought post-midterm exam questions). The topics will be socialism, planning and global engagement. Students will present material to the class, small groups, or the public through oral presentations, webpages, or other means that enable corroboration of fact and argument. The topics will be socialism, planning and global engagement. Students will collaborate in pairs or groups to learn, design, solve, create, build, research or similar. The topics will be socialism, planning and global engagement.

Unless explicitly authorized, you are not permitted to use a laptop computer, tablet computer, smart phone, or cell phone during class. Watching movies and videos, playing games, checking the scores on espn.com, and chatting with your friends are disruptive behavior that will not be tolerated.

Accessibility Resources and Service (ARS)

The University of North Carolina at Chapel Hill facilitates the implementation of reasonable accommodations, including resources and services, for students with disabilities, chronic medical conditions, a temporary disability or pregnancy complications resulting in barriers to fully accessing University courses, programs and activities.

Accommodations are determined through the Office of Accessibility Resources and Service (ARS) for individuals with documented qualifying disabilities in accordance with applicable state and federal laws. See the ARS Website for contact information: <https://ars.unc.edu> or email ars@unc.edu.

ASSIGNMENTS

The primary textbooks are *Russian Economy from Lenin to Putin* and *Kremlin Strikes Back: Russia and the West after Crimea's Annexation*. Students are responsible for the entire works, even though class coverage will be selective. Supplementary readings

including those pertinent to the midterm and final exam will be indicated at the appropriate time. There is no rigid schedule. It will unfold in the fullness of time.

KEY READINGS

Readings pertinent to the midterm and final examinations will be assigned in a timely manner.

COURSE OUTLINE

This course will concentrate on Russia's post-Soviet evolution and the current conflicts between Russia and the Ukraine, United States and European Union. There will also be a discussion of Russia's pivot toward China. The strengths, weaknesses and prospects for the Kremlin's economy will be exhaustively analyzed. All the material described will be covered, but pre-Soviet aspects will be interwoven into the narrative instead of being treated chronologically.
