### **New Student Group: The International Students' Organization**

The International Students' Organization (ISO) aims to create a supportive and engaging space for international students to connect, share experiences, and celebrate the rich tapestry of cultures represented on our campus. We believe that by promoting cultural exchange, we can enhance the overall university experience for both international and domestic students alike. The ISO will organize events, workshops, and activities that celebrate diversity, encourage dialogue, and build meaningful connections.

The idea for ISO stemmed from recognizing the need for a platform where international students could come together, share their unique perspectives, and navigate the challenges of being in a foreign country. By addressing this demand, ISO seeks to bridge cultural gaps, promote understanding, and create a more unified campus community.
